

Ontario Lighting Program

Beginning January 1, 2023, under Ontario Regulation 522/20: Electrical and Electronic Equipment (EEE Reg), there are new requirements for producers who supply obligated lighting products into Ontario, to collect and recycle lighting products at their end-of-life.

Turolight has partnered with **Product Care** to facilitate our customers' efficient recycling in Ontario.

Product Care Recycling is a not-for-profit, industry organization providing "Extended Producer Responsibility" ("EPR") programs to producers of lighting and other designated products across Canada and in the US. They are a registered Producer Responsibility Organization (PRO) in Ontario setting up a comprehensive lighting recycling program to support lighting producers who register with Product Care in meeting their EPR obligations that come into effect on January 1, 2023.

Please visit their website to find out more information about your **Turolight** products' recycling needs.
