

OUR COMPETITORS HAVE BEEN UNABLE
TO IMPROVE ON OUR **GENESIS TECHNOLOGY**

SO WE DID...

INTRODUCING
**GENESIS
FUSION**
T2 TECHNOLOGY

SMALLER

GENESIS FUSION is the next revolution in CFL miniaturization.

GENESIS FUSION lamps have a M.O.L. ranging from only 3.42" to 4.5", giving users more freedom to replace inefficient incandescent bulbs with energy saving fluorescents.

BRIGHTER

GENESIS FUSION average 70+ lumens per watt with a CRI value greater than 85.

 GENESIS FUSION	 INCANDESCENT @130V
10 watts	60 watts
13 watts	75 watts
15 watts	85 watts
20 watts	100 watts
23 watts	125 watts

GREENER

GENESIS FUSION lamps are not only energy efficient; they are the safest CFL for the environment. Containing only 1mg of mercury, these lamps are Energy Star compliant for an average of 10,000 hours, and with the use of lead-free solder and glass they are RoHS compliant as well.
