

GENESIS

Finally energy savings with the light intensity and versatility of an incandescent bulb.

Everyone wants to save money but until now that meant compromising on brightness or the type of fixture you could use. Turolight continues its commitment to bring you better lighting products through research and design, by introducing a technology that allows for a more compact design without giving up brightness. Turolight went even further by making this technology use even less energy. Whether it is a tiny 13W (75W equivalent) used in the home or a 100W (375W equivalent) commercial use bulb, all of Turolight customers will benefit from the amazing advances it has made in the technology of lighting.

Each model features:

- CRI >82
- High Lumen Maintenance throughout life
- Low Mercury Content <2.1mg
- Reliable, long lasting circuit design – rated for 10,000 hrs
- Patented “legless” twist design minimizes MOL
- T3 glass & rare earth phosphors yield efficiencies of 70+ LPW
- Proprietary “cold spot” design allows full brightness instantly
